

LIZ ANTOINETTE ANGUREN

FULL STACK DEVELOPER

Cebu City, Philippines | (+63) 9562368630 | lizanguren12@gmail.com

linkedin.com/in/liz-anguren | github.com/LizAntoinette | lizanguren.netlify.app

PROFESSIONAL PROFILE

Full-stack software engineer with 5+ years of professional development experience and 2+ years of computer science teaching experience. Currently working with Ruby on Rails, Vue.js, PostgreSQL, Sidekiq, and REST APIs on a production SaaS platform.

Experienced in backend and frontend development, third-party integrations, performance improvements, production troubleshooting, and API development.

TECHNICAL SKILLS

- **Backend:** Ruby, Ruby on Rails, Python, FastAPI, PHP, Laravel, Java, Spring Boot, C#, ASP.NET, REST APIs
- **Frontend & Mobile:** JavaScript, TypeScript, Vue.js, React, React Native, Expo, Angular, HTML, CSS, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite, MariaDB
- **Tools & Cloud:** Git, GitHub, Bitbucket, Docker, AWS, DigitalOcean, Linux, Sidekiq, Redis, Jira, Rollbar
- **AI / ML:** OpenAI API integration, reinforcement learning, DDPG, model inference

WORK EXPERIENCE

Full Stack Developer (Jan 2023- Present)

Coach Catalyst | United States (Remote from the Philippines)

- Develop and maintain features for a SaaS coaching platform using Ruby on Rails, Vue.js, PostgreSQL, and Sidekiq.
- Build REST APIs and background jobs for web and mobile features.
- Built integrations for Fitbit and Google Health, and help maintain existing integrations with Oura, Withings, and Terra.
- Work with OAuth, webhooks, data synchronization, and third-party API issues.
- Investigate production bugs and improve application performance and reliability.
- Improved a data-heavy workflow from around 28 seconds to 4-6 seconds.
- Review code, add tests, document APIs, and collaborate with QA and mobile developers.

Software Engineer (Feb 2022 - June 2023)

SenarySoft | Marikina City, Philippines (Remote)

Full-time: February-December 2022 | Part-time: January-June 2023

- Primarily customized and maintained PHP-based CRM and e-commerce platforms to support client-specific workflows and requirements.
- Implemented feature changes, investigated bugs, and improved existing platform functionality.
- Contributed to the development and testing of a hybrid mobile application.
- Supported an ASP.NET/C# website during a short-term assignment of approximately three months.
- Participated in code reviews and collaborated with other developers on fixes and application updates.

Computer Science Lecturer (Aug 2019 – Dec 2021)

Eastern Samar State University | Borongan City, Philippines

- Designed and taught computer science and information technology courses.
- Updated lessons and practical exercises to reflect current development practices.
- Created lesson plans, assessed student performance, and maintained academic records.
- Developed website for internal university use.
- Guided students through programming assignments and software projects.

Junior Web Developer (May 2018 – Dec 2018)

WinterWind | Borongan City, Philippines

- Helped develop Coinflyer.com, a cryptocurrency trading website, focusing on HTML and CSS interfaces.
- Used PHP, MySQL, and JavaScript to implement and update application features.
- Tested and troubleshooted functionality before deployment.
- Coordinated translation work and supported developers during periods of limited staffing.

SELECTED RESEARCH PROJECT

TakeiBuddy - AI-Assisted Financial Literacy Learning System

Master's Thesis Project · In Progress

docs.takeibuddy.me

- Developed a cross-platform budgeting application using React Native, Expo, FastAPI, PostgreSQL, and SQLite.
- Integrated a privacy-aware DDPG policy that generates adaptive budgeting guidance from normalized financial ratios.
- Implemented personalized challenges, guided reflections, assessments, progress tracking, model inference, and rule-based fallback recommendations.

EDUCATION

Master of Science in Computer Science

Cebu Institute of Technology–University | Cebu City, Philippines

Coursework completed; thesis in progress alongside full-time employment.

Thesis: *TakeiBuddy: An AI-Assisted Financial Literacy Learning System Using Gamified Reflective Budgeting*

Bachelor of Science in Computer Science

Cebu Institute of Technology–University | Cebu City, Philippines

2014–2018

LANGUAGE SKILLS

- **Waray:** Native
- **Tagalog:** Professional proficiency
- **English:** Professional proficiency
- **German:** Intermediate (B1)
